## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-15 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshida et al (6,425,451) in view of Nanami (6,190,221). Yoshida shows everything except employing the device in a watercraft comprising a hull defining an engine compartment and a seat being positioned generally over at least a portion of the engine compartment. Nanami teaches that it is old in the art to employ a crankcase ventilation device in a watercraft engine having a seat 17 positioned over the engine compartment. It would have been obvious to one having ordinary skill in the art to modify Yoshida et al by employing it in a watercraft engine having a seat over the engine compartment, in order to provide improved exhaust characteristics. See illustration of Yoshida et al on next page:

### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 3747

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16-18 and 20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over Yoshida et al (6,425,451) in view of Nanami (6,190,221) and further in view of claims 1, 7, 14-19 of U.S. Patent No. 6,681,750. Yoshida et al in view of Nanami show everything except the throttle body disposed within the plenum chamber (claim 16), the second ventilation system inlet communicating with the reservoir (claim 17), the overflow passage connecting the cylinder head of the engine to the reservoir (claim 18), and the separation chamber disposed within the plenum chamber (claim 20). These features are all claimed in U.S. Patent No. 6,681,750, and the Yoshida et al in view of Nanami could have been modified by the inclusion of these features, in order to make the engine more compact.

#### ***Allowable Subject Matter***

Claim 32 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 24-31 and 33 are allowed.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 13-20 have been considered but are moot in view of the new ground(s) of rejection.
